

Job Title: QA Analyst

Location: Meerut

Experience: 3-6 years

Job Type: Full Time

Sai Computers Limited (SCL) is a leading consulting firm specializing in the power sector, providing innovative solutions and strategic insights to clients across different utilities in India. At SCL, with a steadfast commitment to innovation and excellence and a commitment to leverage data-driven approaches we differentiate ourselves through our relentless pursuit of excellence and our unwavering dedication to our clients' success. With more than 40 years of experience, offices in 100+ cities, our 2500+ team members of industry experts, data scientists, and engineers and field executives work tirelessly to develop and deploy innovative solutions to empower energy companies, utilities, and policymakers to navigate the complexities of the modern energy landscape with confidence and clarity.

SCL Focus areas are:

- Input Based Distribution Franchisee
- Advanced Analytics
- Digital Products
- Operations

Role Description:

We are seeking a detail-oriented and proactive **QA Analyst** with **3–6 years of experience** in software quality assurance, specializing in **test automation** and Bachelor's degree in Computer Science, Information Technology, or a related field. The ideal candidate will be responsible for designing, developing, and executing automated test scripts to ensure the reliability and performance of our software applications. You will work closely with cross-functional teams including developers, product managers, and DevOps engineers to uphold and enhance quality standards across the development lifecycle.

Selected candidate's day-to-day responsibilities include:

- Design, implement, and maintain robust and reusable automated test scripts for web, mobile, and API-based applications.
- Collaborate with development and QA teams to define test plans, scenarios, and acceptance criteria based on business requirements.
- Conduct functional, regression, integration, and performance testing using automation frameworks.
- Monitor test executions, log defects, and follow through to resolution in collaboration with developers.
- Analyze test results, identify root causes, and ensure issues are properly documented.
- Continuously improve automation frameworks, tools, and processes for efficiency and coverage.
- Maintain and enhance CI/CD pipeline integration for automated testing.
- Ensure alignment with best QA practices and advocate for quality throughout the SDLC.

Requirements:

- 3-6 years of hands-on experience in software testing with a strong focus on test automation.
- Proficiency in automation tools such as Selenium, Playwright, Cypress, Appium, Postman, or REST-assured.
- Strong programming/scripting skills in Java, Python, JavaScript, or similar languages.
- Experience with test management tools (e.g., JIRA, TestRail, Zephyr).
- Solid understanding of Agile methodologies, DevOps, and CI/CD pipelines (e.g., Jenkins, GitLab CI).
- Strong analytical and problem-solving skills with keen attention to detail.
- Excellent verbal and written communication skills.
- ISTQB certification or equivalent is a plus.
